

SHOWER PANEL INSTALLATION INSTRUCTIONS

A. Bent pipe

B. Top shower

C. Screws

1. Firstly, please fix the bent pipe to the panel body.
2. Then install the top shower to the bent pipe.
3. Connect the water-inlet-hose with shower panel.
4. Use a drill to make holes on the ground according to the size of the base plate, and fix the shower panel on the ground with screws.
5. Open the switch and inspect whether the hose is leaking, if all goes well, then finish the installation.
