

RAIN RN150

ELECTRIC VALVES

Rain is very proud to introduce new versions of the well known family of the electric valve RN150.

Thanks to a long study of the fluid's dynamic this small dimension doesn't prejudice the loss of charge, that remains low until more than 80 litres per minute.

The wide range of possible combinations and the extremely competitive price, makes this new valve economic and suitable for different kind of installations, in small and medium residential applications.

This line of electric valves can count on 13 (thirteen) versions, 7 (nine) with flow control, 6 (eight) without, from 1/2" up to 3/4" and 1", with the male thread or the female thread and even with the unique Rain solution of the union connection.
